DCI SECURITY COMMITTEE
MONTHLY ACTIVITIES REPORT
AUGUST 1980

1. The Committee Chairman submitted an FY 82 budget request for funds to continue Community efforts to assure security against technical penetration of the new U.S. Embassy being constructed in Moscow, and to provide for a balanced Community program of security R&D, education and training. The second part includes funds required to provide the Community's sole technical countermeasures school with up to date equipment comparable to that used in the field and designed to meet current technical threats. The two parts of the request total [redacted] and [redacted] respectively. [redacted]

2. A Committee staff member, [redacted], participated in a briefing on the COMIREX Automated Management System (CAMS) II, a second generation development effort. His participation is designed to ensure that matters of Community security interest are dealt with and coordinated on a timely basis. [redacted]

25X1A

3. The Community program coordinated by the Committee to assure security for the new U.S. Embassy being built in Moscow continues. Arrangements satisfactory for U.S. security have still not been obtained on Soviet customs clearance procedures for U.S. materials being shipped to the site and on a Moscow warehouse for secure storage of building materials. The Department of State's Foreign Building Office has arranged for storage in Helsinki of up to 100 shipping containers of building materials. Thirteen containers are stored there now. One of them contains security equipment (e.g., TV monitors). Soviet custody of such items, which is explicit in their proposals for customs inspection, would give them opportunity to modify our equipment. Other sensitive U.S. equipment is scheduled for shipment in the near future. Arrangements are being made to afford it appropriate protection. [redacted]

25X1

4. The Committee scheduled for October its second 2-day seminar for principal members and chairmen of subcommittees and working groups. This will give opportunity to assess past committee performance, discuss major security issues, and chart directions for the future.

25X1

5. The Investigative Standards Working Group met twice during August and agreed to recommend the creation of Intelligence Community appeals procedures for persons who have had SCI access denied or revoked. The Working Group recommendation is being forwarded to the Security Committee for consideration as an annex to DCID 1/14.
